## Safety Tips: Halloween 2021

Halloween is around the corner! The CDC recommends that all adults and children aged 12 and older get a COVID-19 vaccine, but many trick-or-treaters aren't eligible to get vaccinated yet. To help you enjoy a sweet and safe Halloween, remember to: track local transmission rates, take precautions like wearing a mask and washing your hands, and avoid activities that put you and the children around you at increased risk for COVID-19.

Follow community guidelines from your local health department, and stay at home and away from others if you are sick or have been in contact with someone who is sick or has COVID-19 symptoms. Public Health Communications
